DETAILED ACTION

1. This communication is in response to BPAI decision dated May 5, 2006.

Reasons for Allowance

2. In deference to the Board holding that “the present invention teaches a technique, not found in the prior art, for selecting a target group by comparing attributes values of the sample population to desired values and reducing the number of attributes by determining the statistical measure difference between the attributes of the target and sample populations”, claims 1, 3-6, and 13-25 are allowed.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to Applicants’ disclosure.

Reference to Kononenko et al., “Attribute Selection for Modelling”, Future Generation Computer Systems, Volume 13, Issues 2-3, November 1997, pages 181-195, is cited as presenting principal issues and techniques in determining which attribute(s) is important for the purpose of modelling.
